

First Flush Advanced & Plus with Max Chamber Upgrade Kit

Divert the dirtiest water from your roof away from your tank.

Advanced with Max Chamber Upgrade Kit	90mm	WDDP21
Plus with Max Chamber Upgrade Kit	90mm	WDDP12

The First Flush Advanced and Plus diverters protect your rainwater quality by diverting the “first flush” of the most contaminated water from your roof away from your rainwater tank

The First Flush Advanced features the Advanced Release Valve that allows you to program how frequently the first flush chamber empties.

Both variants include a Max Chamber Upgrade Kit that allows you to upgrade your first flush system from a 90mm chamber pipe into 100mm making it easier to divert the optimum first flush volume.

- Minimises fine and dissolved particles entering your tank
- Reduces sediment build-up in your tank and lower tannin deposits
- Reduces nutrient load in your tank to limit anaerobic fermentation and algae growth
- Protects household fixtures, appliances, pumps and filtration systems
