

Downpipe Diverters Inline and In-pipe

Collect rainwater easily from your downpipe

| | | |
|-----------------|----------|--------|
| Inline (Round) | 90mm | DDIV01 |
| In-pipe (Round) | 90/100mm | DDIV02 |

Our Inline and In-pipe Downpipe Diverters capture a high proportion of the water flowing through your downpipes.

The Inline variant filters leaves and debris – giving you lots of great quality rainwater

- Collect up to 600 L/hour using a 12mm garden hose or up to 1200 L/hour using a high flow 32mm hose
- On/Off switch gives you control over your system
- Simple installation onto your downpipes
