

FOL-DA-TANK™ DA-TUB-TANK

ENSURE YOU HAVE SAFE DRINKING WATER IN A MOMENT'S NOTICE

Avoid the long lines and bulky packaging associated with bottled water especially in emergency situations. The average human needs 1 gallon of water to survive for 4 days. This 15-gallon tank could last a family of 4 just over 2 weeks. When severe weather is predicted, simply take your standard shower head off and replace with the provided assembly. Water costs \$9.60 per gallon on average when consumed in bottled water form. Tap water cost \$0.004 per gallon. This unit can be deployed in under 2 minutes by following these 6 easy steps on the back side.

SPECS:

- 15-gallon capacity
- Dimension when empty – 40"X23"
- Dimensions when filled – 40"X20"X8"
- 125 lbs. when filled
