

T120 System Specifications

120 Gallon Tote-A-Lube Tanks are designed to lower total fluid and oil costs by enabling bulk delivery / pick-up of fluids. Fluidall's proprietary stackable tank design creates a modular multi-fluid storage system within a 32" square footprint. 120

gallon tanks can also be stacked with other Tote-A-Lube tank sizes. Tanks can be customized with additional openings in either the top or sides, and can be configured with rolling casters or forklift bases for portable in-shop or in-field distribution.
